

SECURE SOFTWARE ENGINEERING

We design, build & defend software.

From architecture to deployment to active defense, engineered to ship fast and built to last.

01 — WHAT WE DO

VaultFifty1 is a secure software engineering studio. We help teams architect resilient systems, build production software, and defend it in the wild, so security isn't a phase you bolt on later. **It's how the software is made.**

02 — WHAT WE DELIVER

 <p>Secure Architecture Threat-modeled system design, from data flow and trust boundaries to scalable infrastructure.</p>	 <p>Product Engineering Full-stack builds shipped on modern, hardened foundations by senior engineers, with no handoffs.</p>
 <p>Cloud & DevSecOps Automated pipelines, infrastructure-as-code, and continuous compliance baked into every release.</p>	 <p>Application Security Code review, penetration testing, and remediation that finds the gaps before attackers do.</p>
 <p>Active Defense Monitoring, detection, and incident response that never sleeps. Eyes on your systems 24/7.</p>	 <p>Security Audits Independent assessments mapped to SOC 2, ISO 27001 and OWASP, with a clear path to fix.</p>

03 — WHY VAULTFIFTY1

<p>✓ Security-first, not security-after Threat modeling starts on day one, not after the incident.</p>	<p>50+ Systems built & secured</p>	<p><24h Critical incident response</p>
<p>✓ Senior engineers only The people who scope your work are the people who build it.</p>	<p>99.99% Defended uptime</p>	<p>10+ Years of combined depth</p>
<p>✓ Fast without trading safety Hardened defaults let us ship quickly and sleep at night.</p>		
<p>✓ Transparent engagements Fixed scope, clear deliverables, no surprise invoices.</p>		

04 — HOW IT WORKS

<p>STEP 01 Assess We map your systems, threats, and goals.</p>	<p>STEP 02 Design We architect a secure, scalable blueprint.</p>	<p>STEP 03 Build We engineer and ship production-ready software.</p>	<p>STEP 04 Defend We monitor, patch, and harden continuously.</p>
--	--	--	---

05 — WHO WE ARE

A small, senior team of software engineers and security specialists. We've shipped and defended systems across fintech, health, and critical infrastructure, and we bring that hard-won experience to every engagement.

Let's build something secure.

Book a free architecture review, and we'll map your biggest risks in 30 minutes.
